### **DETAILED ACTION**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on Jan 22, 2010 has been entered.

#### ***Specification***

2. The preliminary amendment filed October 16, 2003 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: the newly introduced subject matter in paragraphs 49 and 52 which describe wireless video communication. In paragraph 49 of the specification, as originally filed in parent application 08/189,405, applicant states "It is currently recognized that cellular transmission will ultimately provide dynamic motion and high resolutions freeze frame displays." Therefore, it is clear that **at the time of invention**, Applicant did not have possession of the claimed invention.

Applicant is required to cancel the new matter in the reply to this Office Action.

#### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the

unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 17-38, 40-50, 52-67 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-168 of U.S. Patent No. 7,839,984. Although the conflicting claims are not identical, they are not

patentably distinct from each other because claims 17-38, 40-50, 52-67 of the present application are anticipated by claims 1-168 of the patent.

5. Claims 17-38, 40-50, 52-67 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-91 of U.S. Patent No. 7,835,509. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 17-38, 40-50, 52-67 of the present application are anticipated by claims 1-91 of the patent.

6. Claims 17-38, 40-50, 52-67 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-87 of U.S. Patent No. 7,835,508. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 17-38, 40-50, 52-67 of the present application are anticipated by claims 1-87 of the patent.

7. Claims 17-38, 40-50, 52-67 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-195 of U.S. Patent No. 6,323,894. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 17-38, 40-50, 52-67 of the present application are anticipated by claims 1-195 of the patent.

#### ***Response to Arguments***

8. Applicant's arguments filed January 22, 2010 have been fully considered but they are not persuasive. Regarding the objection to the new matter added to the specification, Applicant states that the alleged new matter was canceled. However,

Applicant's amendment did not include a cancellation of the new matter in the specification.
